

Material Safety Data Sheet

Product: Rechargeable Li-ion Cell

Model/type reference: 18650 2000mAh

Nominal Voltage: 3.7V

Rated Capacity: 2000mAh (7.4Wh)

Applicant: Jiangxi Canhui New Energy Science And Technology Co., Ltd

Guangchang Industrial Park, Fuzhou City, Jiangxi Province,

Address: P.R.China

Report No: PN20211224276701

Effective date: 2022-01-01

Revision date: 2021-12-29

Laboratory: Shenzhen NTEK New Energy Technology Co., Ltd.

Room 101, Building C, Fenda Hi-Tech Park, Sanwei Community, Hangcheng Subdistrict, Bao'an District, Shenzhen, Guangdong,

China.

Section 1- Chemical Product and Company Identification

Product Identification: Rechargeable Li-ion Cell

Model No.: 18650 2000mAh

Manufacturer's / Supplier Name: Jiangxi Canhui New Energy Science And Technology Co., Ltd

Address: Guangchang Industrial Park, Fuzhou City, Jiangxi Province, P.R.China

Telephone number of the supplier: +86-18688985878 Emergency Telephone No. (24h): +86-18688985878

Fax: +86-794-43785833

E-mail address: 305900388@qq.com

Referenced documents: ISO 11014:2009 Safety data sheet for chemical products

Version number: V1.0

Section 2 - Hazards Identification

Preparation hazards and classification	Not dangerous with normal use. Do not dismantle, open or shred the Rechargeable Li-ion Cell ingredients contained within or their ingredients products could be harmful.
Apperance, Color, and Odor	Solid object with no odor, no color.
Primary Route(s)	These chemicals are contained in a sealed enclosure. Risk of exposure occurs only if
of Exposure	the cell is mechanically, thermally or electrically abused to the point of compromising
	the enclosure. If this occurs, exposure to the electrolyte solution contained within can
	occur by Inhalation, Ingestion, Eye contact and Skin contact
Potential Health	ACUTE (short term): see Section 8 for exposure controls In the event that this battery
Effects:	has been ruptured, the electrolyte solution contained within the battery would be
	corrosive and can cause burns.
	Inhalation: Inhalation of materials from a sealed battery is not an expected route of
	exposure. Vapors or mists from a ruptured battery may cause respiratory irritation.
	Ingestion: Swallowing of materials from a sealed battery is not an expected route of
	exposure. Swallowing the contents of an open battery can cause serious chemical
	burns of mouth, esophagus, and gastrointestinal tract.
	Skin: Contact between the battery and skin will not cause any harm. Skin contact with
	contents of an open battery can cause severe irritation or burns to the skin. Eye:
	Contact between the battery and the eye will not cause any harm. Eye contact with
	contents of an open battery can cause severe irritation or burns to the eye. CHRONIC
	(long term): see Section 11 for additional toxicological data
Medical	Not applicable
Conditions Aggravated by	
Exposure	
Reported as carcinogen	Not applicable

Section 3 – Composition/Information on Ingredients

Rechargeable Li-ion Cell is a mixture.

Hazardous Ingredients (Chemical Name)	Concentration or concentration ranges (%)	CAS Number
Lithium nickel-cobalt-manganese dioxide	15-20	N/A
Lithium manganese oxide	18-24	12057-17-9
Aluminum (Al)	3-4	7429-90-5
Graphite (C)	15-17	7782-42-5
Nickel	0.2-0.5	7440-02-0
Copper (Cu)	6-7	7440-50-8
Phosphate(1-), hexafluoro-, lithium	1.4-1.6	21324-40-3
Organic solvent	10-11	N/A
N-(2-Phenoxybenzoyl)-N'-(p-tosyl)hydrazine	15.5-16.5	363179-62-8

Labeling according to EC directives.

No symbol and risk phrase are required.

Note: CAS number is Chemical Abstract Service Registry Number.

N/A=Not applicable.

Section 4 - First-aid Measures

Inhalation	If contents of an opened battery are inhaled, remove source of contamination or move	
	victim to fresh air. Obtain medical advice.	
Skin contact	If skin contact with contents of an open battery occurs, as quickly as possible remove	
	contaminated clothing, shoes and leather goods. Immediately flush with lukewarm, gently	
	flowing water for at least 30 minutes. If irritation or pain persists, seek medical attention.	
	Completely decontaminate clothing, shoes and leather goods before reuse or discard.	
Eye contact	If eye contact with contents of an open battery occurs, immediately flush the	
	contaminated eye(s) with lukewarm, gently flowing water for at least 30 minutes while	
	holding the eyelids open. Neutral saline solution may be used as soon as it is available. If	
	necessary, continue flushing during transport to emergency care facility. Take care not to	
	rinse contaminated water into the unaffected eye or onto face. Quickly transport victim to	
	an emergency care facility.	
Ingestion	If ingestion of contents of an open battery occurs, never give anything by mouth if victim is	
	rapidly losing consciousness, or is unconscious or convulsing. Have victim rinse mouth	
	thoroughly with water. DO NOT INDUCE VOMITING. Have victim drink 60 to 240 mL (2-8	
	oz.) of water. If vomiting occurs naturally, have victim lean forward to reduce risk of	
	aspiration. Have victim rinse mouth with water again. Quickly transport victim to an	
	emergency care facility.	

Section 5 – Fire-fighting Measures

Flammable	In the event that this battery has been ruptured, the electrolyte solution contain within the
Properties	battery would be flammable. Like any sealed container, battery cells may rupture when
	exposed to excessive heat; this could result in the release of flammable or corrosive
	materials.

Suitable	
extinguishing	Use extinguishing media suitable for the materials that are burning.
Media	
Unsuitable	
extinguishing	Not available
Media	
Explosion	Sensitivity to Mechanical Impact: This may result in rupture in extreme cases
Data	Sensitivity to Static Discharge: Not Applicable
Specific	Fires involving Rechargeable Li-ion Cell are controlled with water. When water is used,
Hazards	however, hydrogen gas may evolve. In a confined space, hydrogen gas can form an
arising from	explosive mixture. In this situation, smothering agents are recommended to extinguish
the chemical	the fire
Protective	As for any fire, every state the area and fight the fire from a sets distance. Wear a
Equipment	As for any fire, evacuate the area and fight the fire from a safe distance. Wear a
and	pressure-demand, self-contained breathing apparatus and full protective gear. Fight fire
precautions	from a protected location or a safe distance. Use NIOSH/MSHA approved full-face
for firefighters	self-contained breathing apparatus (SCBA) with full protective gear.
NFPA	Health: 0 Flammability: 0 Instability: 0

Section 6 – Accidental Release Measures

Personal Precautions, protective equipment, and	Restrict access to area until completion of clean-up.
emergency procedures	Do not touch the spilled material. Wear adequate
	personal protective equipment as indicated in Section
	8.
Environmental Precautions	Prevent material from contaminating soil and from
	entering sewers or waterways.
Methods and materials for Containment	Stop the leak if safe to do so. Contain the spilled liquid
	with dry sand or earth. Clean up spills immediately.
Methods and materials for cleaning up	Absorb spilled material with an inert absorbent (dry
	sand or earth). Scoop contaminated absorbent into an
	acceptable waste container. Collect all contaminated
	absorbent and dispose of according to directions in
	Section 13. Scrub the area with detergent and water;
	collect all contaminated wash water for proper
	disposal.

Section 7 – Handling and Storage

Handling	Don't handle Rechargeable Li-ion Cell with metalwork. Do not open, dissemble, crush or burn battery. Ensure good ventilation/ exhaustion at the workplace. Prevent formation of dust. Information about protection against explosions and fires: Keep ignition sources away- Do not smoke.
Storage	If the Rechargeable Li-ion Cell is subject to storage for such a long term as more than 3 months, it is recommended to recharge the Rechargeable Li-ion Cell periodically.
	3 months: -10°C~+40°C, 45 to 85%RH
	And recommended at 0°C~+35°C for long period storage.
	The capacity recovery rate in the delivery state (50% capacity of fully charged) after storage is assumed to be 80% or more.
	Do not store Rechargeable Li-ion Cell haphazardly in a box or drawer where they may short-circuit each other or be short-circuited by other metal objects.
	Keep out of reach of children.
	Do not expose Rechargeable Li-ion Cell to heat or fire. Avoid storage in direct sunlight.
	Do not store together with oxidizing and acidic materials.

Section 8 – Exposure Controls and Personal Protection

Engineering Controls	Use local exhaust ventilation or other engineering
	controls to control sources of dust, mist, fumes and
	vapor.
	Keep away from heat and open flame. Store in a cool,
	dry place.
Personal Protective Equipment	Respiratory Protection: Not necessary under normal
	conditions.
	Skin and body Protection: Not necessary under
	normal conditions, Wear neoprene or nitrile rubber
	gloves if handling an open or leaking battery.
	Hand protection: Wear neoprene or natural rubber
	material gloves if handling an open or leaking battery.
	Eye Protection: Not necessary under normal
	conditions, Wear safety glasses if handling an open or
	leaking battery.
Other Protective Equipment	Have a safety shower and eye wash fountain readily

Page 6 of 9

	available in the immediate work area.
Hygiene Measures	Do not eat, drink, or smoke in work area. Maintain
	good housekeeping.

Report No.: PN20211224276701

Section 9 - Physical and Chemical Properties

Physical State	Form: Solid	
	Color: Blue	
	Odor: Odorless	
Change in o	condition:	
pH, with ind	lication of the concentration	Not applicable
Melting poir	nt/freezing point	Not available.
Boiling Point, initial boiling point and Boiling range:		Not available.
Flash Point		Not available.
Upper/lower flammability or explosive limits		Not available.
Vapor Pressure:		Not applicable
Vapor Density: (Air = 1)		Not applicable
Density/rela	tive density	Not available.
Solubility in	Water:	Insoluble
n-octanol/w	ater partition coefficient	Not available.
Auto-ignition temperature		130°C
Decomposition temperature		Not available.
Odout threshold		Not available.
Evaporation rate		Not available.
Flammability (soil, gas)		Not available.
Viscosity		Not applicable

Section 10 - Stability and Reactivity

Stability	The product is stable under normal conditions.
Conditions to Avoid (e.g. static discharge, shock or vibration)	Do not subject Rechargeable Li-ion Cell to mechanical shock. Vibration encountered during transportation does not cause leakage, fire or explosion. Do not disassemble, crush, short or install with incorrect polarity. Avoid mechanical or electrical abuse.

Page 7 of 9

Incompatible Materials	Not Available
Hazardous Decomposition Products	This material may release toxic fumes if burned or exposed to fire
Possibility of Hazardous Reaction	Not Available

Report No.: PN20211224276701

Section 11 - Toxicological Information

Irritation	Risk of irritation occurs only if the cell is mechanically, thermally or electrically abused to the point of compromising the enclosure. If this occurs, irritation to the skin, eyes and respiratory tract may occur.			
Sensitization	Not Available			
Neurological Effects	Not Available			
Teratogenicity	Not Available			
Reproductive Toxicity	Not Available			
Mutagenicity (Genetic Effects)	Not Available			
Toxicologically Synergistic Materials	Not Available			

Section 12 - Ecological Information

General note:	Water hazard class 1(Self-assessment): slightly		
	hazardous for water.		
	Do not allow undiluted product or large quantities of it		
	to reach ground water, water course or sewage		
	system.		
Anticipated behavior of a chemical product in	Not Available		
environment/possible environmental			
impace/ecotoxicity			
Mobility in soil	Not Available		

Persistence and Degradability	Not Available	
Bioaccumulation potential	Not Available	
Other Adverse Effects	Not Available	

Section 13 – Disposal Considerations

Product disposal recommendation: Observe local, state and federal laws and regulations.

Packaging disposal recommendation: Be aware discarded batteries may cause fire, tape the battery terminals to insulate them. Don't disassembly the battery. Completely discharge containers (no tear drops, no powder

rest, scraped carefully). Containers may be recycled or re-used. Observe local, state and federal laws and regulations.

Section 14 – Transport Information

The Rechargeable Li-ion Cell (18650 2000mAh) had passed the UN 38.3 test and is classified as non-dangerous goods and also complies with the UN Recommendations on the Transport of Dangerous Goods; IATA Dangerous Goods regulations, and applicable U.S. DOT regulations for the safe transport of Rechargeable Li-ion Cell.

The Rechargeable Li-ion Cell is transported according to the PACKING INSTRUCTION 965 Section I B of IATA DGR 63rd edition (Proper shipping name and UN ID number: LITHIUM ION BATTERIES, UN No.: UN3480).

However, the Rechargeable Li-ion Cell may also be transported according to the PACKING INSTRUCTION 966 Section II of IATA DGR 63rd edition (Proper shipping name and UN ID number: LITHIUM ION BATTERIES PACKED WITH EQUIPMENT, UN No.: UN3481) or PACKING INSTRUCTION 967 Section II of IATA DGR 63rd edition (Proper shipping name and UN ID number: LITHIUM ION BATTERIES CONTAINED IN EQUIPMENT, UN No.: UN3481).

More information concerning shipping, testing, marking and packaging can be obtained from label master at http://www.labelmaster.com/.

Each package must be labeled with a Lithium Battery handling label.

Li-ion batteries treated as "Non-regulated goods" under the United Nations Recommendations on the Transport of Dangerous Goods, Special Provision 188, provided that packaging is strong and prevent the products from short-circuit.

With regard to transport, the following regulations are cited and considered:

- The International Civil Aviation Organization (ICAO) Technical Instructions (2021-2022 edition).
- The International Air transport Association (IATA) Dangerous Goods Regulations (63rd edition).
- The International Maritime Dangerous Goods (IMDG) Code (Amdt. 40-20).
- The US Hazardous Materials Regulation (HMR) pursuant to a final rule issued by RSPA
- The Office of Hazardous Materials Safety within the US Department of Transportations' (DOT) Research and Special Programs Administration (RSPA)

Section 15 - Regulatory Information

OSHA hazard communication standard (29 CFR 1910.1200)							
Hazardous	V	Non-hazardous					

Section 16 - Other Information

The information above is believed to be accurate and represents the best information currently available to us. However, NTEK makes no warranty of merchantability or any other warranty, express or implied, with respect to such information, and we assume no liability resulting from its use. Users should make their own investigations to determine the suitability of the information for their particular purposes. Although reasonable precautions have been taken in the preparation of the data contained herein, it is offered solely for your
